## EVALUATION

As in every session we will use 15 minutes to analyze how this session has gone. What we liked and what we did not like, what doubts we have, what we would like to do differently, in which learning we would like to deepen. We will make a small summary of what we have learned, all this in an oral form.

In this session an oral interview with an interested and motivated student will be held in order to obtain information about the session in general and the operation of the program.

We will appreciate her feedback, and the new strategies for carrying out the activities she can propose. We will ask her to tell us, in her view, what aspects could be improved.

From this interview we can obtain very important and valuable information, that can really help us to improve our weaknesses and we will continue to work to be more effective in achieving our objectives.

This interview will help us to perceive more clearly how the students feel about the program and the development of the sessions.

Having this knowledge will help us to redirect undesired situations and promote the moments that are most beneficial for learning.

### Next session planning:

- To explain to the students what will be the next session subject.
- To choose the next peer tutor.
